

- 1** At the time specified by your skin care professional, wash the treated area using **Soothing Foamy Cleanser**.

Some patients with more dry or sensitive eyes may experience redness, excess tear production, or other signs of eye irritation while the peel preparation is on the face or for a short time after its removal. Use of an appropriate lubricating eye drop, such as Refresh Plus®, available at most drugstores, is recommended to relieve such symptoms.

- 2** After gently patting skin dry, apply **Soothing Gel**.

AM

- 3** Wash skin with **Soothing Foamy Cleanser**.
- 4** Apply **Soothing Gel** (first 5 days, and as needed thereafter)
- 5** Apply **Oil-Free Facial Sunscreen**

PM

- 6** Wash skin with **Soothing Foamy Cleanser**.
- 7** Apply **Soothing Gel** as needed.
- 8** Apply your prescribed medication as directed
