

- 1 At the time specified by your skin care professional, wash the treated area using **Anti-Redness Foamy Cleanser**.

*Some patients with more dry or sensitive eyes may experience redness, excess tear production, or other signs of eye irritation while the peel preparation is on the face or for a short time after its removal. Use of an appropriate lubricating eye drop, such as Refresh Plus®, available at most drugstores, is recommended to relieve such symptoms.*

- 2 After gently patting skin dry, apply **Intensive Recovery Complex**

AM

- 3 Wash skin with **Anti-Redness Foamy Cleanser**.
- 4 Apply **Intensive Recovery Complex** as needed.
- 5 Apply **Anti-oxidant Emollient Sunscreen**

PM

- 6 Wash skin with **Anti-Redness Foamy Cleanser**.
- 7 Apply **Intensive Recovery Complex** as needed.
