

- 1 At the time specified by your skin care professional, wash the treated area using **Anti-Redness Creamy Cleanser**.

Some patients with more dry or sensitive eyes may experience redness, excess tear production, or other signs of eye irritation while the peel preparation is on the face or for a short time after its removal. Use of an appropriate lubricating eye drop, such as Refresh Plus®, available at most drugstores, is recommended to relieve such symptoms.

- 2 After gently patting skin dry, apply **Anti-Redness Soothing Balm**.

AM

- 3 Wash skin with **Anti-Redness Creamy Cleanser**.
- 4 Apply **Anti-Redness Soothing Balm** as needed.
- 5 Apply **Anti-Oxidant Emollient Sunscreen**.

PM

- 6 Wash skin with **Anti-Redness Creamy Cleanser**.
- 7 Monday, Wednesday and Friday evening: **Apply MWF Soothing Cream**
Sunday, Tuesday and Thursday evening: **Apply STT Soothing Gel**

Cut and tape to bathroom mirror
